

PRESS RELEASE

Vogelsang at BUS2BUS: Hygienic wastewater disposal, clean handling

- **Field-proven RoadPump wastewater disposal systems**
- **BusPlug suction nozzles for easily emptying wastewater tanks**

Essen (Oldenburg), March 7, 2022 – [Vogelsang GmbH & Co. KG](https://www.vogelsang.com) will present its award-winning solutions for hygienic wastewater disposal from buses at **BUS2BUS on 27 and 28 April (hall 21, booth 204)** in Berlin. The RoadPump systems make wastewater disposal hygienic and fast. “Our RoadPump solutions have already proven themselves in practice. Bus, service station and truck stop operators can choose from different series according to their needs. The spectrum ranges from mobile to stationary use, from pure wastewater disposal to the supply of flushing and drinking water,” says Harald Vogelsang, Managing Director of Vogelsang GmbH & Co. KG.

Mobile and stationary wastewater disposal

The **RoadPump Eco** series from Vogelsang offers a cost-effective wastewater disposal system for smaller bus companies. The **RoadPump Plus** series was especially designed for service station and car yard operators. It also features a drinking water filling system and thus covers all water related service needs. In addition, the RoadPump Plus can be equipped with various payment methods and can be used without an operator or operator supervision.

Robust pumps, clean handling

The RoadPump disposal systems are equipped with a Vogelsang rotary lobe pump of the VX series with a particularly compact and robust design. Toilet paper and other foreign objects in the wastewater do not affect the operation of the rotary lobe pump. All of these systems can also be connected to the CollectingMax drip pan, which collects wastewater drained through conventional methods. The wastewater collected is then pumped into the sewer system or into a collection tank.

The BusPlug, a patented, easy-to-fit suction connection for bus waste tanks makes for particularly fast and hygienic wastewater disposal. The BusPlug connects the bus toilet tank and the suction station with a hose. Vogelsang thus creates a continuous disposal system that significantly minimizes soiling on the ground and prevents unpleasant odors.

Vogelsang at BUS2BUS, 27–28 April 2022, Messe Berlin: hall 21, booth 204

About Vogelsang:

Vogelsang GmbH & Co. KG, headquartered in Essen (Oldenburg) in Lower Saxony, develops, produces and sells technically high-quality, individually configurable and service-friendly machines. Founded in 1929, the company grew from a manufacturer of agricultural machinery into a specialist in machines and solutions in the wastewater, agricultural technology, biogas, industrial and transportation technology segments. The innovative family company currently employs over 1,200 people worldwide. As an internationally oriented mechanical engineering group, the company ensures the highest product quality through research, development, and production at the Essen location and in other production facilities in Germany and abroad. Thanks to a continuously growing network of subsidiaries and sales offices, Vogelsang is present with over 50 locations around the world. The company has already received several awards from the economic research institute Prognos AG, among other things as "Germany's innovation leader".
